

NORDIC EARTH Project 2000 trees

Be part of a REAL change!

Sponsor a tree R140

Why sponsor?

- Off-set your company's carbon
- Be part of a REAL change on a grass roots level with several beneficiaries
- Create green spaces at schools and in public places that absorbs the carbon outlet around the South Peninsula
- Support graduates in Urban Agriculture and their future farming

Why Spekboom?

- Indigenous and proudly South African
- Absorbs carbon from atmosphere like a sponge
- Drought proof and adaptable to the environment
- One of the worlds most remarkable plants-can live up to 200 years!

Where does the money go?

R90/tree: Emerging farmers' training in Urban Agriculture

R25/tree: compost and spekboom trees

R25/tree: administration, equipment hire, planting logistics and transport

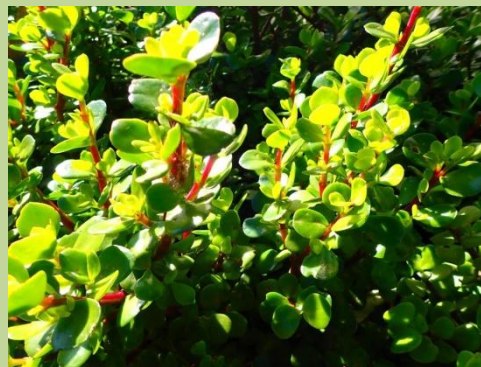

NORDIC EARTH Project 2000 trees

Nordic Earth is a private company (Pty Ltd) based in the South Peninsula outside Cape Town, we are passionate about Living Soil, specialist in bio-integrated farming and committed to empower the unemployed youth of South Africa with skills and confidence in Regenerative and Urban Agriculture.

About the project

We are raising funds to plant 2000 spekboom trees at government schools and public places in the South Peninsula to create long lasting greenery absorbing carbon in our community.

Nordic Earth in collaboration with Green Guerrillas is training a group of unemployed youth in the skills of Urban Agriculture and the funds raised will go towards finishing their 2 year program, our training facility and animal stock and feed.
